The approaching election of ASC community committees for farm program administration in Palm Beach County was announced today by E. E. Cooper, Chairman, Agriculture Stabilization and Conservation County Committee. He called particular attention to the fact that the community committee elections this year are a little later than in former years. They are being held during the third week of September in all agricultural communities throughout the Nation in order to increase the awareness of this important farm program function to eligible voters.

The farm-committee system is a unique means of administering national agricultural programs and policies. The community committees assist the ASC County Committee in administering the price support, acreage diversion, agricultural conservation, sugar, and other farm-action programs in the county; they are particularly responsible for keeping their neighbors informed about the programs.

Lampl, struttred their stuff between halves and entertained the largest crowd that has attended a game in Pahokee in many a moon. Senator Thomas Wins Water And Soil Award

State Senator Jerry Thomas, D-Lake Park, has been presented the Governor's state conservation award for soil and water conservation.

The award was presented to the senator at the annual convention of the Florida Wildlife Federation at Ocala Saturday night and was made by George Lyman of the Governor's Conservation Committee. The award banquet was sponsored by the Sears-Roebuck Foundation and the Wildlife Federation.

The award was presented to Thomas "for his leadership in securing good laws to correct water and air pollution problems; his efforts in providing for a biological survey for the guidance of the Trustees of the Internal Improvement Fund in accepting applications for dredging and fill permits. For aid in setting up the Okeechobee Advisory Committee for the reorganization and restoration of wildlife in the Everglades. And, for his leadership in seeking a solution to problems of water depletion and oil exploration work in the conservation areas" of the Flood Control District.

Thomas introduced in the senate during the regular session of the 1967 legislature the submerged land bill which is to protect marine life from being destroyed by fills and also to provide for the proper establishment of bulkheads.

The legislation has been called by the press as the most outstanding conservation measure since 1940. The legislation requires that a biological and ecological survey be made prior to the expansion of an island or the construction of an island from fill to determine whether marine life would be destroyed. The issuance of a construction or fill permit would be determined by the findings of the survey. The applicant for the permit must pay the cost of the study.

The wheel stance on many models is wider for greater smoothness. Exhaust systems have been redesigned to make them whisper-quiet. Even the clocks tick more softly. A sound car is a silent car. And with every engine, you get the new GM exhaust emission control.

UNIQUE ASTRO VENTILATION

There's a whole new idea in ventilation, called Astro Ventilation, for Camaro, Corvette and the elegant Caprice Coupe. It's also available on many other models. By opening two new vent-ports on the instrument panel, you bring in outside air that can be directed where you want it. This way, you can leave your windows rolled up and add still more to your peace and quiet.

PROVED SAFETY FEATURES

You get the proved GM-developed energy absorbing steering column, folding front seat back latches, dual

master cylinder brake system with warning light, plus many more new features. Among them: energy absorbing front seat backs, and safety armrests that shield the door handles.

MUCH MORE THAT'S NEW

There are new roof lines, some formal and graceful, others sporty and quick. There are new instrument panels, richly designed and all controls within easy reach. There are new interiors, new vinyls, new fabrics, new colors. There are models with Hide-A-Way windshield wipers and headlights that disappear behind grilles. There are new side marker lamps, new recessed taillights. There's even a new ignition alarm buzzer that reminds you not to walk away and leave your keys in the car.

These are the newest, the most different, the most dramatically changed Chevrolets ever. And they're at your Chevrolet dealer's now. You'll thoroughly enjoy slipping behind the wheel, experiencing the smooth new handling and library-quiet ride and, more than anything, seeing and feeling the even greater quality built into every new Chevrolet for 1968.

Ancient Sugar Mill At Bunnell Draws Visitors

BUNNELL—A display of sugar cane and indigo is flourishing at Bulow Plantation Historic Memorial near Bunnell, reminiscent of the crops grown on the huge plantation that was destroyed during the Seminole War.

Park Ranger L. P. Bundy said an acre of the crops is being raised near the memorial's picnic area. He said cotton will be added next spring.

Bundy said that Major Charles Wilhelm Bulow cleared 1,500 acres of his 6,000 acre plantation for the production of sugar cane, 1,000 for cotton, and lesser plots for indigo and rice. The grand old plantation manor, Bulowville, and the surrounding area were burned and stripped by the Seminoles in February of 1836. Ruins of the sugar mill, valued at that time at \$30,000, have been preserved by the Florida Board of Parks and Historic Memorials, and are still standing.

America needs your help.

There is a new plan for Americans who want to help their country as they help themselves. Now, when you buy U.S. Savings Bonds through Payroll Savings where you work or the Bond-a-Month Plan where you bank, you are also entitled to purchase the new higher-paying Freedom Shares. They are available on a one-for-one basis with Savings Bonds in four denominations and are redeemable after one year. Sign up soon.

Questions and answers about Freedom Shares.

Q. What are Freedom Shares?

A. They are the new U.S. Savings Notes—a companion product to the Series E Savings Bond.

Q. Who may buy Freedom Shares?

A. Any individual who purchases Series E Bonds regularly through a formal plan—either Payroll Savings where he works or Bond-a-Month where he banks.

Q. What is the interest rate on Freedom Shares?

A. 4.74% compounded semiannually, when held to maturity of 4 1/2 years. The rate is less if redeemed prior to maturity; and they may not be redeemed for at least one year.

Q. Does this same rate now apply to E Bonds?

A. No. E Bonds continue to return an average of 4.15% when held to their seven-year maturity.

Q. What do Freedom Shares cost?

A. They are issued in face amounts of \$25, \$50, \$75, and \$100. Purchase prices are \$20.25, \$40.50, \$60.75, and \$81.00.

Q. Can Freedom Shares be bought by themselves?

A. No. They must be bought in conjunction with E Bonds of the same or larger face amounts. For example, a \$25 Freedom Share may be bought with a \$25 E Bond, when on a regular plan. The total price would be \$39 (\$20.25 for the Freedom Share and \$18.75 for the Bond).

Q. Can I buy as many Freedom Shares as I want, as long as I buy E Bonds of the same or larger amounts?

A. No. On Payroll Savings, Freedom Share deductions are limited to \$20.25 per weekly pay period, \$40.50 per bi-weekly or semi-monthly pay period, \$81.00 per monthly pay period. On Bond-a-Month, the limit on Freedom Share deductions is \$81.00 per month.
